The performance data quoted represents past performance, past performance does not guarantee future results, the investment return and principal value of an investment will fluctuate so that when redeemed, it may be worth more or less than their original cost, and current performance may be lower or higher than the performance data quoted. To obtain performance data current to the most recent month-end, please call 844-ACFUNDS (844-223-8637) or visit www.AlphaCentricFunds.com.

The maximum sales charge for Class "A" Shares is 5.75%. The Fund's total operating expenses are 2.45%, 3.20%, and 2.20% for the Class A, C, and I Shares respectively.

BarclayHedge Equity Long/Short Index tracks investments taking long positions in stocks that are expected to increase in value and short positions in stocks that are expected to decrease in value. **BarclayHedge Equity Market Neutral Index** tracks investments with directional strategies involves equity-oriented investing on both the long and short sides of the market. The objective of these strategies is not to be market neutral. **Bloomberg Global Aggregate Index** is a flagship measure of global investment grade debt from 24 local currency markets. **Category Multistrategy** tracks investment instruments that primarily trade liquid global futures, options, swaps, and foreign exchange contracts, both listed and over-the-counter. **The MSCI EAFE Index** is a stock market index that is designed to measure the equity market performance of developed markets outside of the U.S. & Canada. **S&P 500 Total Return Index** is a widely recognized, unmanaged index of the approximately 500 largest companies in the United States as measured by market capitalization. **Category Equity Market Neutral** tracks investment instruments that attempt to eliminate the risks of the market by holding 50% of assets in long positions in stocks and 50% of assets in short positions. **Russell 2000® Index** consists of the smallest 2,000 companies in a group of 3,000 U.S. companies in the Russell 3000 Index, as ranked by market capitalization. **S&P GSCI Gold Index** measures performance of commodities. **MSCI US REIT Index** is a free float-adjusted market capitalization weighted index that is comprised of equity **Real Estate Investment Trusts (REITs)**. Indices assume reinvestment of all dividends and distributions. You cannot invest directly in an index.

The Performance shown before September 30, 2016 is for the Fund's Predecessor Fund (Theta Funds, L.P.) The Fund's management practices, investment goals, policies, objectives, guidelines and restrictions are, in all material respects, equivalent to the predecessor limited partnership. From its inception date, the predecessor limited partnership was not subject to certain investment restrictions, diversification requirements and other restrictions of the 1940 Act of the Code, if they had been applicable, it might have adversely affected its performance. In addition, the predecessor limited partnership was not subject to sales loads that would have adversely affected performance. Performance of the predecessor fund is not an indicator of future results.

Investors should carefully consider the investment objectives, risks, charges and expenses of the AlphaCentric Funds. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 844-ACFUNDS (844-223-8637) or at www.AlphaCentricFunds.com. The prospectus should be read carefully before investing.

Important Risk Information

Investing in the Fund carries certain risks. The Fund will invest a percentage of its assets in derivatives, such as futures and options contracts. The use of such derivatives and the resulting high portfolio turn-over may expose the Fund to additional risks that it would not be subject to if it invested directly in the securities and commodities underlying those derivatives. The Fund may experience losses that exceed those experienced by funds that do not use futures contracts and options strategies. Investing in commodities markets may subject the Fund to greater volatility than investments in traditional securities. Currency trading risks include market risk, credit risk and country risk. Foreign investing involves risks not typically associated with U.S. investments. Changes in interest rates and the liquidity of certain investments could affect the Fund's overall performance. Other risks include U.S. Government securities risks and investments in fixed income securities. Typically, a rise in interest rates causes a decline in the value of fixed income securities or derivatives owned by the Fund. Furthermore, the use of leveraging can magnify the potential for gain or loss and amplify the effects of market volatility on the Fund's share price. The Fund is subject to regulatory change and tax risks; changes to current rules could increase costs associated with an investment in the Fund. These factors may affect the value of your investment. Please see the prospectus for all of the principal risks of investing in the Fund.
